

CoPILOT[®] live FLEETCENTER

Fully Integrated Satellite Navigation, Vehicle Tracking and Fleet Management

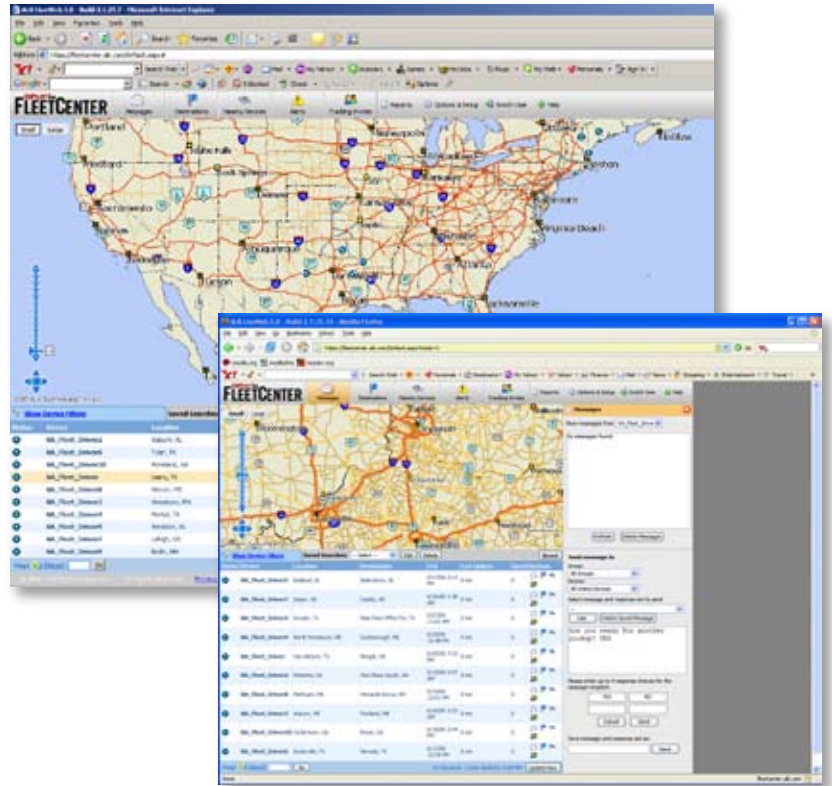

Equip your fleet with connected mobile devices and CoPilot Truck (or CoPilot Live Professional) navigation to track vehicles in real-time, send them new destinations, forward your customer various tracking links, and view status reports of your entire fleet easily and cost-effectively via the Internet.

FleetCenter Core Features

- Real-time multi-vehicle location tracking
- 2-Way Messaging with a driver or the entire fleet
- Find the nearest vehicle or load
- Web-tracking invitations for customers or employees
- Mobile dispatch and remote itinerary updates

FleetCenter Advanced Features

- **Exception Reporting** – Real-time alerts warn about excess speeding, late starts, delays in movement and geofencing (when a vehicle enters or leaves a specified area)
- **Historical Reporting** – Reports generated for review and audit, include overall fleet summary and performance statistics as well as individual reports including, location, speed, and mileage history for a certain vehicle or group of vehicles.
- **Enterprise Integration options** – An organization can choose to use ALK's hosted version of FleetCenter or host FleetCenter on their own. Additionally, with the CoPilot Professional Software Development Kit, you can make CoPilot Truck and FleetCenter an easily deployed integrated fleet management and navigation solution.

Track Your Fleet In Real-Time

Based on an intuitive web interface, FleetCenter integrates with the CoPilot family of GPS navigation products to provide real-time location information and data about the entire fleet. Vehicle location and trip data is reported to FleetCenter via a mobile Internet connection (GPRS, CDMA, etc.)

The Fleet Advantage

- Reduce avoidable non-revenue mileage and fuel costs by 10%
- Improve on time performance & customer service
- Cost effective way to improve driver/dispatcher communication
- Improve driver retention with safe and stress-free GPS navigation
- Avoid costly fines and vehicle damage
- Improve accounting and operations consistency
